

# Now, medical specialists with higher education will be trained in the region

Starting from the 2021-2022 academic year, a medical faculty was established at the State University of Physical Culture and Sports in Chirchik city, and training of personnel in this direction began.

During the visit of the head of our state to Tashkent region on March 19 of this year, tasks were set for the training of medical personnel. After all, the demand for medical specialists with higher education in the region has always been in a high level.

Now the university conducts full-time training of undergraduate students in "Medical Faculty" direction.

In the current academic year, a total of 200 students were accepted to the faculty of "Medical Faculty", 100 of them on a grant basis and 100 on a contract basis.

The other day, a solemn opening ceremony of the medical faculty was held at the educational institution.

The event was attended by representatives of education and healthcare, activists of the region and the Chirchik city .

At the end of the event, according to tradition, the first-year students took the oath in the specialty of medical science.
